

PopPop Makes Applesauce

Compiled and Edited by Grandma F.
Featuring Nava

Dedicated in Memory of Nava's Namesakes

Marilyn and Irving Scherr

Larry Friedman

It's winter.

Here is an apple tree.

It is covered with snow.

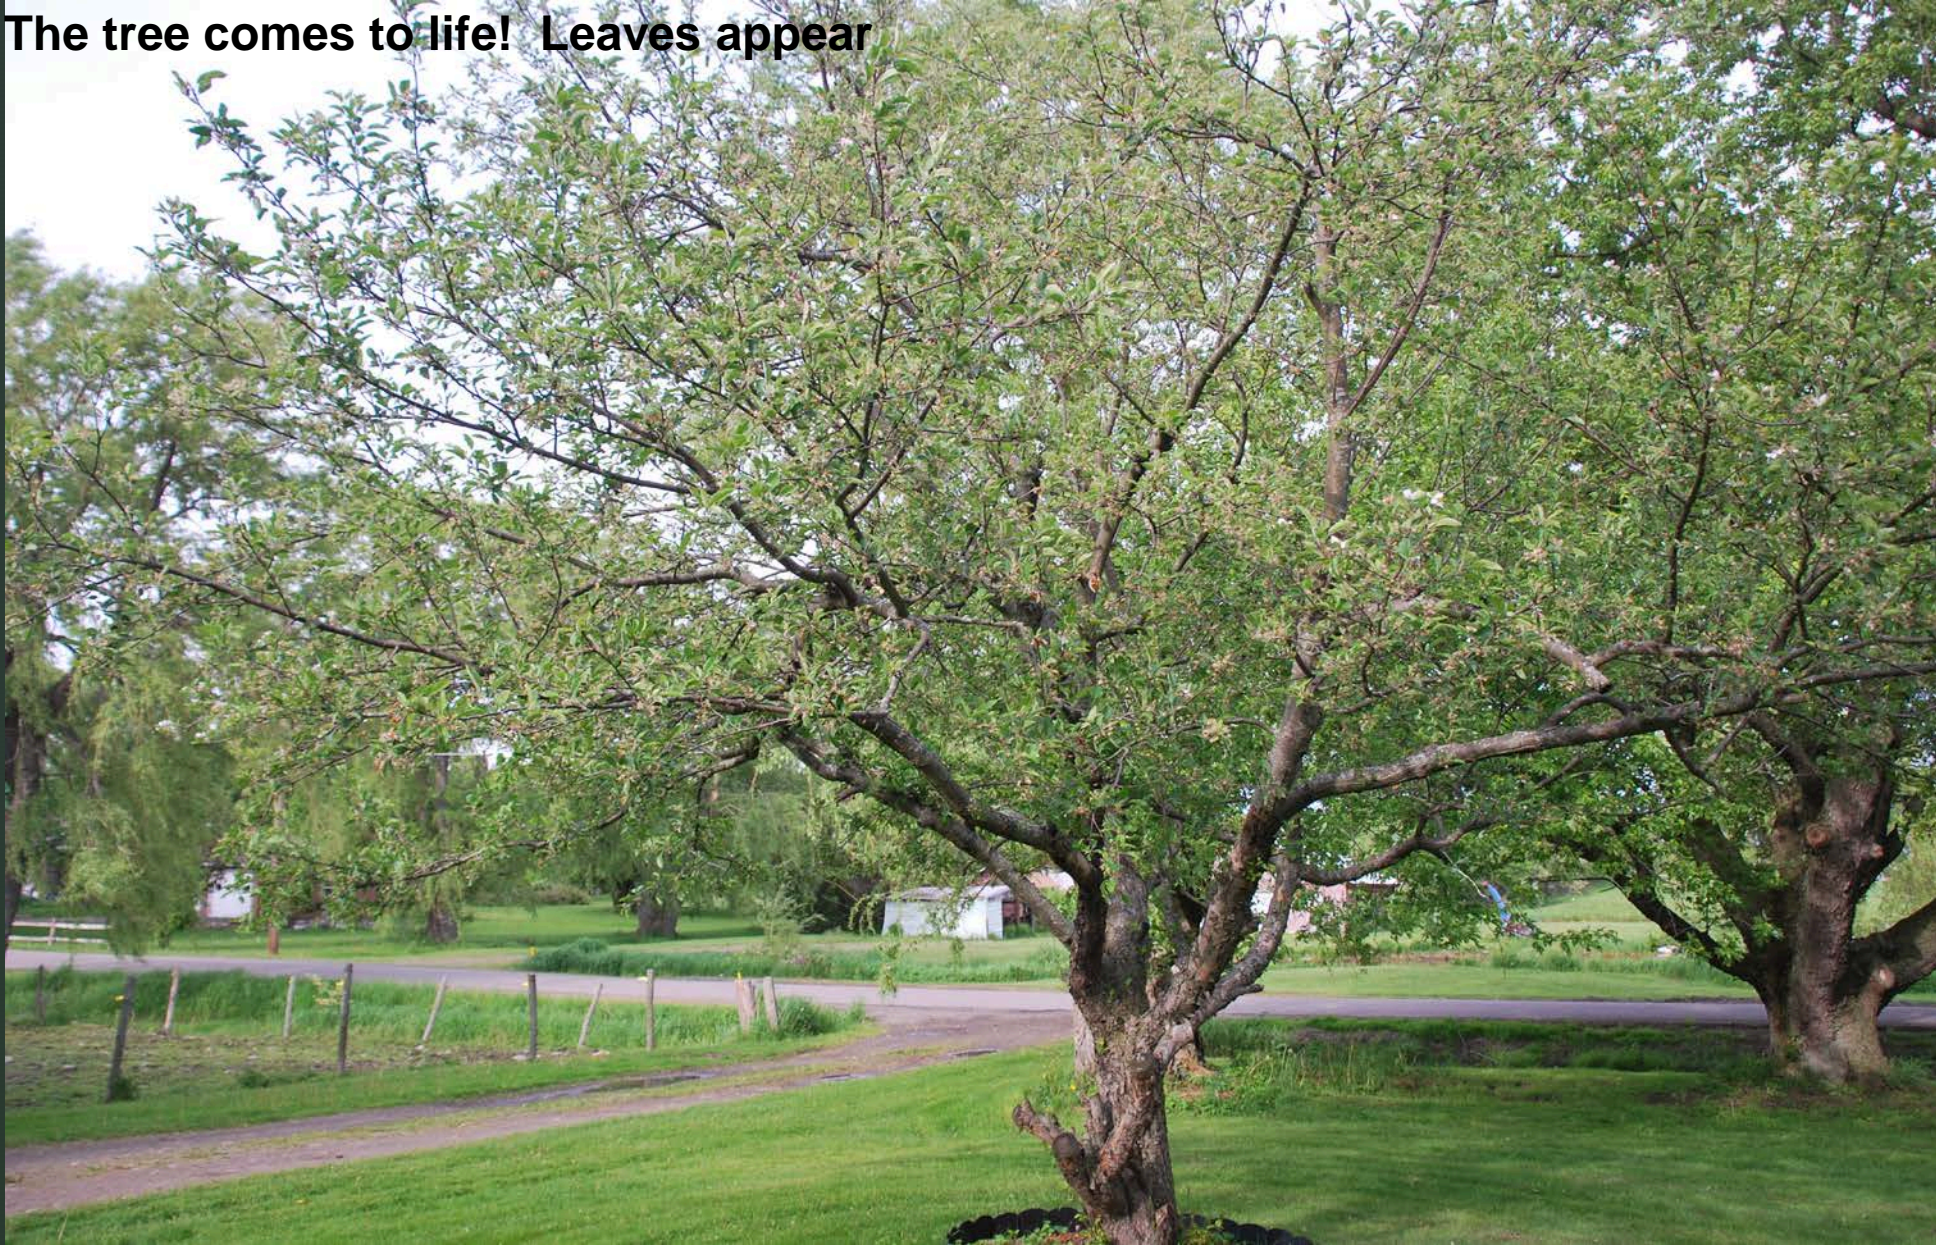

No leaves, no flowers,
no apples.

A new year begins, the
months go by..January,
February..

March, April....It's spring.

The tree comes to life! Leaves appear

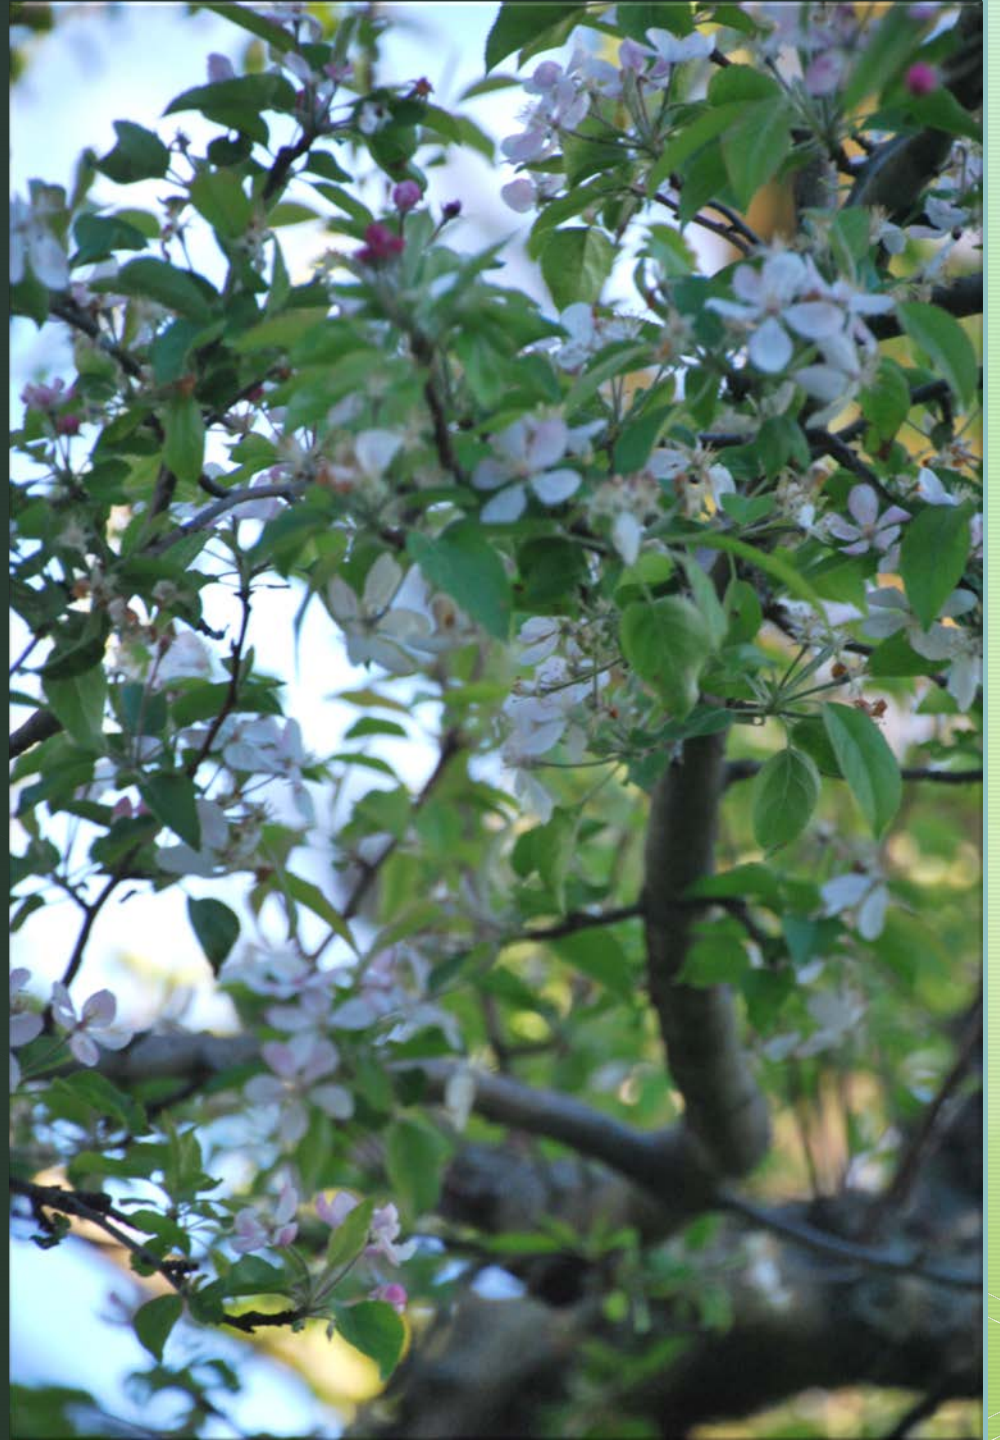

And purple flower buds

And then ... pretty white flowers

By May, many of the flowers fall to the ground.....

But in June....

As summer comes into view, we see little apples where the flowers once were.

And they grow....

And into July and August they grow....

And grow into September and then by October

They are ready to harvest

In November
PopPop gets to
do his job.

The apples are
washed

And sliced..

And Cooked

Then the sauce is separated from
the skins and seeds.

Everyone can help!!!

The sauce is then put in jars and the jars are sealed

But it only stays in the jars until it's time to eat it.....

Wait – did we miss a month – we missed December.
We have a special use for applesauce in December..

Latkes, (potato pancakes) and applesauce are perfect for Chanukah
